Summary

I am a consultant senior lecturer and consultant in public health medicine. I have experience in mixed-methods research with experience in adapting behaviour change interventions, designing and conducting feasibility and pilot RCTs, and delivering public health interventions through primary care. I have experience in quantitative meta-analysis and qualitative meta-ethnography, in addition to work with large quantitative observational datasets.

My doctorate was funded through an NIHR Fellowship and involved developing a physical activity intervention to prevent disability in older people. A theory-driven behavioural intervention was developed; the feasibility of which was tested in a mixed-methods pilot randomised controlled trial (RCT), the PACE study. Outcome data collected in the study included: recruitment rates; acceptability and feasibility of the trial processes; accelerometry and self-reported physical activity; physical function; mental health; and quality of life. The pilot RCT included a nested process evaluation using qualitative interviews and non-participant observation.

Biography

I obtained my primary medical degree from the University of Oxford, graduating in 2007.

Following Foundation training I joined the public health specialty training scheme and obtained an MSc in Public Health (with distinction) from the London School of Hygiene and Tropical Medicine where I was also awarded the Chadwick Daley prize. In 2010 I was awarded the Faculty of Public Health Michael O'Brien Prize for performance in the MFPH examination; I am a Fellow of the Faculty of Public Health.

In 2012 I was awarded an NIHR Doctoral Research Fellowship and received my PhD in 2016. Having completed specialty training in public health I have been appointed as a consultant senior lecturer and consultant in public health medicine since 2018.

Activities / Findings

I am a consultant senior lecturer and consultant in public health medicine. I have experience in mixed-methods research with experience in adapting behaviour change interventions, designing and conducting feasibility and pilot RCTs, and delivering public health interventions through primary care. I have experience in quantitative meta-analysis and qualitative meta-ethnography, in addition to work with large quantitative observational datasets.

Teaching

I co-lead the "Essentials of Public Health and Health Improvement" unit on the University of Bristol's MSc Public Health. I also contribute to a revision course for public health specialty registrars undertaking the examinations for Membership of the Faculty of Public Health, I am an accredited Academic and Educational Supervisor, and I have experience supervising academic F2 doctors.
